ROS.org Metrics

ROS community websites that are hosted by the OSRF and support our open source community.

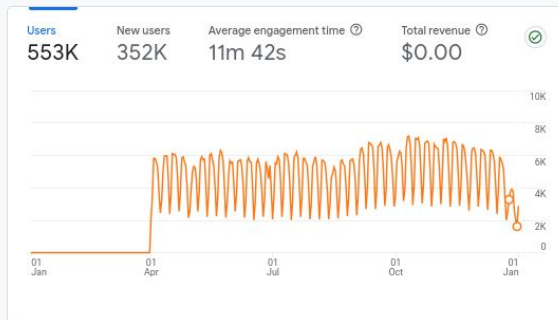

ROS.org Metrics

- We usually use October as our benchmark month for ROS data.
- Some metrics use the most recent data available.
- Where possible we show annual data and year over year data.

A Note on Website Metrics

- In April of 2023 Google Analytics, our primary website analytics platform, had a major upgrade to a system called “Google Analytics 4”, or “GA4”.
- The new and old versions of Google Analytics are not compatible, and direct comparisons between data stored in each system are difficult. We’ve included the GA4 metrics and where possible tried to compare the year on year changes.

Realtime data not supported for this comparison.

Gazebo Metrics

For 2023 we've calculated
some metrics for Gazebo!

Gazebo Considerations

- There are presently two major versions of the Gazebo simulator: Gazebo Classic, denoted by release numbers, and Gazebo, formerly Ignition, denoted by alphabetic release names.
- Gazebo Classic is distributed as a monolithic binary with a handful of supporting libraries. Modern Gazebo consists of dozens of independent binary packages per installation. As such, it is difficult to report an estimated number of installations for each version.
- OSRF hosts Gazebo binaries in two locations: the Oregon State University Open Source Lab (OSU-OSL, packages.ros.org), and the OSRF Amazon Web Services account (packages.osrfoundation.org). We report download data from these servers only. We do not report download data from mirrors and other sources (e.g. upstream Ubuntu).

OSU OSL Server	755,761	755,172	-0.08%
Total	N/A	1,531,399	N/A

Gazebo has two primary servers, the OSU OSL (packages.ros.org) server that serve ROS packages like `ros-desktop-full`, and the OSRF AWS server (packages.osrfoundation.org) that is primarily used for desktop installs of stand-alone Gazebo. We do not have historical data for the OSRF AWS Server.

Gazebo Downloads By Version (November 2023)

	Gazebo Classic	New Gazebo	Total
OSRF AWS Server	28,732	747,495	776,227

Total	553,106	978,293	1,531,399
Percentage	36.12%	63.88%*	

** Modern Gazebo consists of multiple packages per install. We report the ratio of downloads, not the ratio of installs (i.e New Gazebo does not make up 64% of the community, at least not yet!).*
